

Disaster Relief

What We Do:

- Help registering with FEMA and applying for FEMA assistance
- Assist with advocacy and appeals
- Connect survivors to available community financial resources
- Identify household needs and program eligibility
- Create attainable recovery plans for disaster recovery
- Arrange construction resources and repair for property damaged by natural disasters

The Disaster Case Management program assists survivors in creating a recovery plan while connecting them with available resources for an achievable and successful recovery, while following COVID-19 guidelines outlined by state and local authorities.

St. Vincent De Paul Case Managers are available to help households in Sacramento and Amador Counties affected by the California Winter Storms that occurred December 27, 2022 - January 31, 2023
